Fig. 2

3. Selecting and changing

Warning! At first start up of device run a SCAN function to search new stations and add them to list.

Dab radio stations are broadcasted in blocs called multiplex, each multiplex include up to 32 stations. Station list is displayed in form of Multiplex name which includes name of stations. *Fig.3*

For easier explore of station list we can roll or unroll given multiplex.

For this purpose use roll button from MMI control panel.

Fig. 3

4. Searching process

To start SCAN function, press FUNCTION button **1**, then select and press  button which is shown on display, using knob from MMI control panel **2**. Fig.5, Fig.6

Process of searching and adding new stations can take about 40 sec. After finish of SCAN procedure number of added multiplex will be shown on display **3**, then device will start playing last listening station or first station from list (if last listened station is not available).

Warning! When received station has poor quality Signal, sound can disappear for short moments or completely.
