

WEFA WF-706 Universal Bluetooth Hands-free Kit

1. Introduction

The WF-706 Universal Bluetooth Hands-free Module is an Amplifier BT Kit. The working principle is to intercept the sound source from the headunit process it through the power amplifier chip, and then delivery the high quality sound to the cars' speakers. They are compatible all the headunits which with Quadlock and Standard ISO Connectors. The cable tree allows the installation become simpler. It also comes with a mini remote control, which can be used to adjust the volume, switch tracks, change modes and answer or hang up the phone.
